

# Senior Contracts Manager

Competitive salary dependent upon experience, plus Company car  
Nottingham (with extensive UK wide travel)

OnSite Specialist Maintenance core activities include infrastructure refurbishment and structural repairs, with a particular focus on structural waterproofing and concrete repairs, chemical resistant linings, cathodic protection, carbon fibre strengthening and condition surveys.

We are looking to recruit an experienced Contracts Manager to work from our Nottingham office but with regular travel and stay throughout the UK.

The role and principal responsibilities may be summarised as follows:

- You will ensure that all work is mobilised effectively on site – on time, within budget, safely and with the customer's needs firmly in mind
- You will go the extra mile to ensure that jobs are completed to the excellent standard required and your success criteria will be repeat business from the customers you deal with
- You will take full responsibility for the profitability of each job – really owning the customer, the contract and the site
- You will manage a team of experienced site employees – driving productivity and developing a culture that people want to work in
- You will price, deliver and invoice your own jobs ensuring that any variations are documented and that the terms of engagement are agreed
- You will ensure the highest standards of health and safety on your jobs and develop your team to produce great results in a timely, efficient and safe manner
- You will support other contracts managers with their own projects as required

The ideal candidate should have a track record in delivering great contracts in concrete repair and possess the following skills:

- An effective and efficient people manager
- Strong commercial acumen, with a focus on profit
- Excellent organisational skills

**Closing date: Monday 10 April 2017**
